## MINING, BUSINESS AND STOCKS

## DEPRESSION IN STOCKS SICKENING

Butler-Liberal the Only One Recording Any Advance During The Forenoon Calls.

#### DALY-WEST DOWN TO \$12.60.

Goldfield Bonaza Brought Out Again-Grand Central Weaker - Quotations and Sales.

The forepoon sales of the Mining Exchange aggregated 16,450 shares, for which was paid \$2,789.18. The general tone of the market was depressed and sickening; scarcely anything escaped without a shrinkage in price. Daly-West was administered another knifing and sold down to \$12.60 on the open board: 30 cents a share under the closing offer made during the regular call. Butler-Liberal was the only stock which exhibited any strength, and it came out at the end with a slight advance to its credit. Daly was not in as good tone as it was earlier in the week. It sold at \$2.45. Goldfield Bonana was brought out again at 5 cents Recent reports received from the Nevada gold camp seem to be fa-vorable, and local officials feel very hopeful of the future. Victoria, which mine adjoins the Grand Central in Tin-tic, has declined almost 25 per cent durin gthe past few weeks, it selling at 75 cents on the open board. The passing of the Grand Central dividend caused further depression in that stock, and it was offered at \$3.25. quotations and sales

#### CALIENTE GOLD MINE.

Night Shift Put On in the Long Tun-

Special Correspondence. Caliente, Nev., Aug. 11.-The Caliente Gold Mining company, whose proper-ties adjoin the townsite here, has put on a day and night shift on the tunnel of the Blue Bird, which is in 185 feet, and within the next 15 feet it is expected the free gold ledge will be struck, which shows a width of 22 feet

grass roots, and an assay value of COLUMBUS CON. MEETING.

Stockholders Will Authorize Articles of Incorporation Changed. The stockholders of the Columbus

Consolidated Mining company are hold-ing a special meeting today for the pur-pose of authorizing an amendment to the articles of incorporation, raising the par value of the stock from 50 cents to \$5 a share.

At the conclusion of the meeting, or possibly tomorrow morning, the direc-tors will meet to levy an assessment of 20 cents a share.

#### A TINTIC MERGER.

Manhattan and Old Colony Are Likely To be Brought Together.

There is a movement on foot for the merger of two Tintic properties—the Manhattan and Old Colony and Eureka. The directors of each corporation have taken eatiles in the corporation have taken action in the matter and the shareholders of the former will meet on the 16th inst. to reject or ratify the proposition; those of the latter will gather for the same purpose on the day

preceding.

The Old Colony company is capitalized for 500,000 shares, and the Manhattan for 1,000,000. It is proposed to form a new company to absorb the old ones, with a capital stock of 500,000

receive 200,000 shares for their 600,000 in the old company, while 100,000 is to be apportloned to the Manhattan, the renaining 200,000 shares to go into the

reasury.

The properties of the two companies to the ie adjoining and contiguous to the ower Mammoth and Black Jack do-

#### THE BECK HIT HARD.

The Decision of Referee Williams Came As a Stunning Blow. The findings of Referee Parley I

Williams, in the damage sult instituted by the Eureka-Hill Mining company against he Bullion-Beck and Champion Mining company have bee The referee, in his decision, has taxed

the Bullion-Beck and Champion to the amount of \$56,941.62 which must be paid to the plaintiff for what has been declared the unlawful extraction of 158 tons of ore from territory belonging to the Eureku-Hill company. In rendering his decision Referee Williams said:

Williams said:
"The preponderance of evidence shows that the defendant's employes excavated the trespass stope either in 1895 or in 1896. The testimony of Nelson as well as the circumstances of taking out the bulk justifies the conn that the extraction of ore was knowingly and wulfilly by the de fendant. Opposed to the evidence of witnesses for the plaintiff are the statements of Kirby and Roundy, that no work was done in that part of the mine, the latter contradicting the statement of Nelson that the work there was done under his direction. There is a direct conflict on that point between his tesconflict on that point between his testimony and Nelson's. I think Kirby had no knowledge that the work was done, or of he did, has forgotten it. The circumstances that the bulkhead was taken out to enable the miners to proceed with the work, in view of the previous establishment of the compromise line which was generally well known, would seem to justify the conclusion that the work was done with the knowledge of those in charge of the operations of the mining for the defendant company, and if they did not actually know it, it was their duty to know it, and the omission

If they did not actually know it, it was their duty to know it, and the omission to discover what it was their duty to ascertain does not relieve them from the charge that the work was done with knowledge and intentionally. "The evidence does not justify the conclusion that the portion of the stope between the blue line and the bulkheads was done at a time subsequent to the compromise agreement, and therefore no allowance is made for the ore west of the bulkheads. ore west of the bulkheads,

'The engineers agree that the con-tents excavated in the stope east of the bulkheads is 1932 cubic feet. The minbulkheads is 1932 cubic feet. The miners state that they took out no waste: that the ore body extended from wall to wall of the stope as it now exisie; that it was generally of uniform quality and was a good quality of ore. They denominate it 'shipping ore.' Other evidence shows that at the time the stope was discovered by the plaintiff company, there was some waste upon the bottom. The testimony is not very definite as to the amount of the waste. The testimony of Bossert, Wilson and Brooks makes it quite clear that there Brooks makes it quite clear that there was some excavation in excess of the was some excavation in excess of the ore. This appears to have been the case by the testimony of all these witnesses, along the bottom of the stope at the time they took observations and samples. This testimony then, in connection with the testimony that there was some waste on the bottom of the stope justifies the conclusion that the stope justifies the conclusion that the whole space excavated was not ore. The estimates, however, of Wilson and Brooks as to cubic contents are arbi-

trary and in conflict with the testimony on the part of the plaintiff. I conclude therefore that the waste in the stope was relatively small, compared with the ore, and while the evidence seems to make it clear that some deduction should be made on account of waste, it is not at all clear or definite as to the amount, and I conclude from all the testimony that it did not exceed 10 per cent of the cubic contents of the stope east of the bulkhead. I have therefore deducted 193 feet, or 10 per cent, leaving the cubic contents extracted, 1,738 feet, and allowing 11 cubic feet to the ton, would make 158 tons of ore. plaintiff. I con- I

The samples taken from the stope "The samples taken from the stope by Wilson and Bossert differ widely in value. The total values per ton, less cost of mining at \$4 and the freight and treatment charges of \$9.75, as figured by Mr. Dickson on Wilson's samples, leaves net value of \$48.97 per ton, while the average value resulting from the samples taken and figuring done by Mr. Bossert gives a net value of \$170.32 per ton, allowing, however, only \$2.56 for mining. The values based upon 17 general car samples representing 79 mine eral car samples representing 79 mine cars of ore taken from what the tescars of ore taken from what the testimony shows to be on the same vein and just beneath the trespass stope, gives a net value, alowing \$4 per ton for mining, of \$120.13, and the referee takes that as a basis of value. This would give a total value of 158 tons—\$18,380.54, which being multiplied by three gives the amount of the judgment for treble damages of \$56.941.62. While for treble damages of \$56,941.62. While for treble damages of \$56,941.62. While the evidence was that the average cost of mining during that year on the ores in the Bullion-Beck and Champion company's ground was \$2.56, I think the evidence of the number of miners at work and the time they were engaged in removing this ore, makes \$4 per ton a reasonable allowance for the mining of this particular ore, and that sum is allowed by the referee.

"I conclude from the testimony of the

"I conclude from the testimony of the witnesses as well as the circumstances and surroundings, that the plaintiff did not know of this excavation until its workmen broken into it at the east end, which time was within the statute of limitations. I further conclude that the plaintiff is not chargeable with needs limitations. I further conclude that the plaintiff is not chargeable with negligence or wilful ignorance of the fact of this excavation, and that it is excised under the law for not having discovered this trespass earlier than it did, and that therefore the plea of the statute of limitations is not received. statute of limitations is not maintain

Manager P. T. Farnsworth of the Manager F. T. Farnsworth of the Bullion-Beck and Champion Mining company said today that although the case had been decided against his corporation, the latter is not ready to pay it. The case will be fought further in the courts.

#### JUMPED COAL CLAIMS. Manti Parties Stake Off Property in Ferron Canyon.

Several Manti people, including P. P. Dyring, James Crawford, P. Andersen, Chris Madsen and Manager Kerr of the Chris Madsen and Manager Kerr of the Sanpete Valley railroad, have jumped a large number of coal claims in Ferron canyon that were previously located by Ferron and Castle Dale parties, says the Eastern Utah Advocate. The original coations with the locations were inal locators claim their locations made strictly in accordance with law and that they have done considerable development work on much of this property. They do not care how much of such work the present locators do, but they are preparing to put up a good contest fight before the land office and interior department before the title passes from the government to anyone

#### but themselves.

South Columbus Assessment. Manager J. A. Jacobson said today that the owners of all but 9,000 shares had paid the late assessment of a cent a share, but expects the delinquents to pay up long before sale day.

## SALT LAKE AFTER MINING CONGRESS

Indications Point to a Spirited Contest at Meeting to be Held In Portland, Oregon.

#### TIBBALLS HEADS COMMITTEE.

Will work Hard to Have Permanent Headquarters Established in This City.

Portland, Or., Aug. 12.-Salt Lake ity is after the permanent headquarters of the American Mining congress in a way that denotes fatth in their power. At a mass meeting held by mining men there recently, committees on building site, finance, and on temporary quarters for the headquarters were appointed. The council of the Church of Latter-day Saints has been asked to permit the use of their magnificent assembly hall for the offices and meeting until such time as a permanent building can be built.

Four hundred applications for mem-bership were requested several weeks ago from Sait Lake, and with them the question whether or not proxies will be honored. When it was replied that they will not, the securing of membership went ahead undeterred, and evidently Salt Lake City intends to have the largest delegation at the session Thursday a request was received for 200 additional application blanks. So en is the rivalry between the cities ambitious to secure the honor that there bids fair to occur during the ses-sion which is to be held in Portland Aug. 22-27, the prettiest contest seen in a great American industrial organization convention in recent years. W. H. Tibbals, chairman of the Commercial club mining committee, is in charge of the plans for the permanent headquarters campaign.

This morning the headquarters of Secy. Mahon were transferred from the city hall to the armory, where he is located in a convenient office on the sec ond floor.

#### HUCK LOSES AGAIN.

Suit Over Annie Laurie Stock May Go to Supreme Court.

Huck, president of the Annie Laurie Mining company, has suffered another reverse in the courts and according to a decree entered yesterday in the district court for Piute county he must deliver to F. C. Rutan and Willard F. Snyder, the plaintiffs in the action brought against him, 1,500 shares of stock in the Annie Laurie Mining company upon the payment to him by them the sum of \$17,210.09—unless he gets relief in a higher court. Before the acquisition of the Annie Laurie stock and the organization of

the present company, Rutan and Huck entered into an agreement whereby the former was to find a good mining pre position. Rutan was to furnish his services, knowledge, skill, etc., and Huck was to provide the money. Rutan was to have one-third of everything found. Trouble arose and later Wilfound. Trouble arose and later Willard Snyder bought half of Rutan's contract with Huck. Huck originally advanced \$51,630.26 for 5,000 shares, all of which amount, through dividends and the sale of 500 shares of stock, he has received back except the \$17,210.09 now ordered to be paid to him by plaintiff in this suit.

The motion made for a new trial was overruled and the case will probably

overruled and the case will probably be carried on up to the supreme court for final settlement.

#### INTERESTED IN UTAH. Geo. Foster Peabody Developed Carbou County Ceal Mines.

George Foster Peabody, who was George Foster Peabody, who was a few days ago made treasurer of the Democratic national committee, was the first man to put money into the development of Sunnyside coal mines and other properties of the Utah Fuel company in Carbon county, says the Easern Utah Advocate. He gave liberally at the retirement of himself and asociates from the Rio Grande Western railway to the fund for hospitals for miners in the four camps of this coun-ty and also to the Young Men's Chris-tian association building which is soon to go up at Helper and to cost between \$40,000 and \$50,000.

#### HURT AT SMELTER.

For Injuries Received Joseph Young Wants \$2,000 from Utah Consolidated.

Joseph Young filed suit in the district court today against the Utah Consolidated Mining company to recover the sum of \$1,999\$ damages for personal injuries received by plaintiff while employed at defendant's smelter on July 6, 1904. It is alleged that plaintiff was at work on a ladder cility. tiff was at work on a ladder oiling some machinery when a large weight was negligently dropped on him from above, knocking him to the ground and inflicting injuries about the head and face which he claims are perma-

#### CONCENTRATES.

Solon Spiro, manager of the Silver King Consolidated, is at that Park City property today.

Constructing Engineer Joseph R. Focht has accepted a position with the Amalgamated Copper company in Mon-Peter Porter has taken his departure for Goldfield to examine into the merits

f a mining proposition for an eastern The ore and bullion settlements re

ported late yesterday were as follows: Crude or and concentrates, \$27,900; base buillon, \$29,000. The Anaconda property, located in the La Sal mining district, and con-sisting of eight claims, is soon to under-

go expert examination. David Keith returned last night from a trip to Tonopah and Goldfield to which camps he accompanied Man-

ager Edson of the D. & R. G. railroad. The latter went on to Denver. F. R. McNamee, the well known atterney of De Lamar, Nev., departed for the southern camp last night after having attended a political convention at Winnemucca.

Lawrence Green, the well known Ida o mining operator, has returned from a pilgrimage to the camps of the state on the north. While away he visited the Lost Packer which he looks upon as

States geological survey, who is looking over the camps of this state, will de-part this evening for the properties of the Newhouse Mines & Smelters corporation in Beaver county.

The directors of the Grand Central at their last meeting decided to pass the Augustd ividend of \$25,000. The company has inaugurated an extensive campaign of development, which in-cluded the sinking of the main shaft, and it was thought advisable to use the money for this purpose.

Supt. C. L. Rood returned last evening from the Daly, Ontario and Nail-driver properties in Park City. He reports the former as being in better condition than it has been in a long time. At the Ontario the reconstruction of the No. 3 shaft is progressing favorably. Some delay has been caused by the slow arirval of lumber.

Manager Tony Jacobson of the Co-lumbus Consolidated received a call umbus Consolidated received a call yesterday afternoon from Rev. John M. Beyd of Chicago, a Columbus stockholder, who is en route home from a trip to California. Mr. Boyd expressed a desire to visit the mine before proceeding east. Accordingly ceeding east. Accordingly, Manager Jacobson arranged for transportation and Rev. Boyd accompanied by his wife and two sons, who are with him on the western trip, left for camp last even-

#### PROPAGATING THE PEACH.

PROPAGATING THE PEACH.

The peach is perhaps one of the eastest of all trees to bud, and any bright boy or girl, says an exchange, ought to be able to grow the most desirable and hardiest budded varieties. Pits, of the peach are saved in August and September from ripening fruit and ought to be stratified in moist soil, or should they be allowed to lie considerable time and become dry it is considered wise to let them stand in very moist soil or stratified earth for some little time before planting. Then they should be planted in soil that has been so carefully prepared that it is not likely to dry out during the succeeding dry winter. The kernel of the pit should be plump enough with moisture so that the frosts of winter expanding the moisture of the pit should runture the shell and allow germination the following spring. These pits should be planted three lenkes apart in nursery rows 3½ feet apart. With good cultivation they will attain a height of from two to five feet the first segson, depending on the character and quality of the soil and the amount of rainfall and cultivation. From the 10th to the end of August these little trees should be budded at the surface with matured leaf buds, not fruit buds, from other-trees of desirable varieties. Using a very thin and sharp knife a cross cut is made just through the bark, a silt an inch or more in length below it, allowing the insertion of the bud cut from the twig in such manner that there is the slightest possible film of wood and bark one-half to three-quarters of an inch in length. This bud is tucked in this open slit of bark and then tied in, using three or four wraps below the bud and as many above, tying with raffia or twine, the object being to keep the bark closed to exclude air and water.

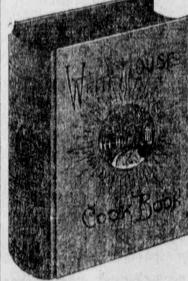

#### WILL TEACH HOW TO WORK.

Mrs. Amanda W. Reed, of Portland, Oregon, who died at Pasadena, Cal., in May last, provided in her will for the founding of an institution in Portland to be known as the Reed institute, in memory of her husband, the late Simon G. Reed. The bequest will amount to about \$2,000,000. Her will specifies that the institute shall combine instruction in the fine arts and selences with manual training, and that it shall be conducted with especial regard to the needs of young men and women compelled to earn their own living.

#### AND TAKES ALL HIS PAY.

Does that young Mrs. Blinkey support her husband?"
"Support him? You might call it that
if you want to. She sang too much, but
my personal opinion is that she holds
him up every Saturday night."—Cleveland
Plain Dealer.

# OPENED ACTIVE.

Everything, Excepting Union Pacific, Which Lost, Was Higher.

#### BIG REALIZING IN PACIFICS.

Caused Some Hesitation When Things Took an Upward Turn, Strength Developing in New Quarters.

New York, Aug. 12 .- The stock market today opened active and a moderate fraction higher except for Union Pacific, which fell a point under heavy realizing. Profit-taking was also in evidence in Southern Pacific, which opened up a quarter and then ran off to a small fraction under last night on heavy trading.

The market hesitated for a short time on the realizing manifest in the Pacifics and then turned upwards with strength developing in new quarters. There were advances of 1 to 11/2 in Amalgamated Copper. Smelting preferred, Canadian Pacific, Colorado & Southern second preferred, Denver & Rio Grande preferred, the Metropolitan Traction stocks and North American. Atchison's rise above 80 was the only notable example of strength in the grangers. A rise of 1% in Lead and 1% in Smelting and 2% in the preferred, falled to hold the market, and prices drift. ed to hold the market, and prices drift d downwards. Union Pacific got 1½ under last night,

#### Sugar %, Third Avenue 1, and Metro-politan Securities %. The other prom-inent stocks showed fractional losses. Bends were easier at noon.
